**NEW DIVISION OF RELIANCE WORLDWIDE CORPORATION, STREAMLABS™, LAUNCHES
STATE-OF-THE-ART SMART HOME WATER MONITOR**

Wireless, Water Monitoring Device Unveiled at 2018 Consumer Electronics Show

LAS VEGAS, NV – January 9, 2018 – Reliance Worldwide Corporation (RWC), a leading manufacturer of plumbing brands SharkBite®, Cash Acme® and Holdrite®, announced today the launch of its new Streamlabs™ Smart Home Water Monitor.

Unveiled on the opening day of the Consumer Electronics Show in Las Vegas, Nevada, the Smart Home Water Monitor is a non-invasive wireless device that offers early leak defense and water monitoring capabilities, in real time, through the custom designed Streamlabs mobile app, compatible with both iOS and Android devices. Retail price is \$199.

Providing early leak detection notification and real-time data about water consumption habits, the Streamlabs Smart Home Water Monitor:

- Protects against costly water damage
- Encourages a conservation mindset for end users
- Customizes alerts and configures settings using a convenient mobile app
- Enables monitoring of plumbing systems from any location
- Provides peace of mind

The Streamlabs Smart Home Water Monitor utilizes state-of-the-art ultrasonic technology to deploy soundwaves both downstream and upstream through plumbing pipe, measuring the difference in “time-of-flight” between two specified points to obtain accurate flow data. The data is recorded by the monitoring system, where it is easily accessed by the end user. This technology, coupled with a simple, non-invasive installation method, opens up a unique opportunity in the market that has not previously existed.

“With the Streamlabs Smart Home Water Monitor, we are introducing the public to the first ‘intelligent water system,’ said Jeff Long, director of marketing and operations, Streamlabs. “With our longstanding plumbing expertise and smart home technology knowledge, we look forward to creating a new category within the marketplace that revolutionizes the way individuals view water supply and consumption.”

In what is being referred to as the “Internet of Water™” – the fusion of the Internet of Things (IoT) and plumbing manufacturing – Streamlabs is at the forefront of developing and commercializing smart home technology. The division’s innovative smart home solutions will help consumers, plumbing professionals and service providers rethink the way they use water.

For more information on the Streamlabs Smart Home Water Monitor, please contact Jeff Long at jeff.long@rwc.com, 412.979.7828, visit www.streamlabswater.com and/or www.facebook.com/streamlabswater.

About Reliance Worldwide Corporation

Reliance Worldwide Corporation® (RWC) is a global manufacturer of water control systems and plumbing solutions for residential, commercial and industrial applications. From the innovative SharkBite Push-to-Connect system to the advanced line of Cash Acme water control valves to the innovative Holdrite pipe support and firestop systems, RWC develops, manufactures and delivers trusted solutions for the plumbing trade.
